MASTER THE CHAOS

WITH ONESPOT BILLING SOFTWARE

How well is your insurance AR managed? Do you have a clear picture of what's happening inside your insurance billing process?

Often eyecare practice owners describe their insurance billing operations as "a black hole" or "chaotic."

When chaos reigns, your insurance payments slow. You have no visibility into what's truly happening. No control over your insurance billing operations. And your AR starts to bloat.

OneSpot is productivity software that will bring order out of your insurance billing chaos.

DESIGNED BY EXPERTS IN EYECARE BILLING

OneSpot is owned by RevCycle Partners, an industry leader in outsourced revenue cycle management services. The software is built upon the same technology that RevCycle Partners designed for its eyecare billing team, which serves hundreds of practices across the U.S.

Our two billing modules:

Insurance AR Manager: A centralized digital hub for billers, where they organize, manage, track and ultimately *resolve* unpaid insurance claims.

Claim Scrubber: An automated claim scrubber that analyzes insurance claims *before* you submit them, resulting in fewer denials, quicker payments, and improved AR.

THE ONESPOT ADVANTAGE

A Centralized Digital Hub.
OneSpot streamlines and organizes your insurance billing procedures, processes, and workflows.

A Clear View into Billing Operations.
OneSpot's user-friendly dashboards give you a clear picture of your aging while enabling you to monitor your biller's activities. No longer are your insurance billing operations a black hole.

A Tool to Make Your Biller More Efficient.
No longer is your process stored in Excel spreadsheets, Post-It Notes, and Google Drive. OneSpot makes your biller more efficient and effective at the critical work of getting your practice paid on time.

IS IT TIME TO INVEST IN YOUR INSURANCE BILLING?
