

# VISION CLAIMS KEYING

Find relief from the tedium of keying data.

Tedious. Draining. The last thing your biller wants to and has time to do. That's what practices tell us about keying vision claims.

At RevCycle Partners, we understand the frustration. Our Vision Claims Keying service simplifies and accelerates the entire process, ensuring accurate submissions, timely payments, and streamlined revenue cycle management.

Vision Claims Keying involves the meticulous process of re-inputting patient data from your PMS/EHR into payer portals. It's a time-consuming task that often results in inefficiencies, data entry errors and administrative headaches.

## How We Ensure Security and Compliance

- ✓ **Expert Oversight:** A dedicated RevCycle Partners billing expert manages every aspect of the claim keying process.
- ✓ **Data Security:** Your PMS/EHR system is accessed exclusively by a RevCycle Partners team member. We have designed and built an enterprise insurance billing technology that is used to manage the vision claims keying process. Data is transmitted securely, ensuring confidentiality.
- ✓ **HIPAA Compliance:** Our software protects practice information and data, and ensures full HIPAA compliance.

## Say Goodbye to the Tedium!

For just \$2.50 per claim, discover how RevCycle Partners can help you free your biller for more important tasks. For more information, contact [sales@revcycle-partners.com](mailto:sales@revcycle-partners.com).
